

Rochester FSDO FAAS Team presents:

Elmira/Corning/Horseheads EAA Chapter 533 Safety Seminar

Supplemental Type Certificate Compatibility is not a new issue. You can imagine that special mission aircraft, and even sometimes less than special aircraft, need multiple modifications. These modifications need to play well together. Sometimes it does not end well.

We will help educate owners and operators of all aircraft with multiple STCs about the potential hazards of incompatible STCs and encourage them to have their aircraft evaluated to determine if the multiple STCs adversely affect the aircraft's structural strength, performance, or flight characteristics

Be sure to join us for Bill's interesting and informative discussion. The meeting is open to anyone interested in aviation.

Directions: Take Sing Sing Road to Aviation Drive to the EAA Chapter 533 Hangar
