

SAFE Techniques for CFIs and Pilots

SAFE CFI-PRO™ provides the "Missing Manual" of techniques from Master Instructors. Using **Incremental Mastery** results in faster learner progress and superior pilots who become lifetime learners.

The integrated process, "**Reflective Analysis**," is a technique that every pilot can benefit from for personal improvement and greater safety!

We all are optimizers who tend to "normalize" skills that result in success. But **some "success" results from luck that can "normalize" risk.** **Reflective analysis** is a valuable antidote to this natural process that improves the safety of every pilot when used regularly.

Sunday, April 7th, 8 pm EDT - Register online [here](#)!

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
