

## Help! My Brain is Trying to Kill Me!

This live, virtual presentation examines how our unconscious mind often plays an important, and not always helpful, role in our decision making. Several psychological concepts such as heuristics and cognitive biases are discussed in a way designed to provide a practical understanding of how they affect our aeronautical decision making. Some practical mitigation strategies are also presented. Several recent accidents will be discussed. Live discussion will follow the presentation. The program will last approximately one hour fifteen minutes.

Shelby County Airport, 265D Weathervane Road, Calera, Alabama Hangar F

The Airport is at Exit 234 off of I 65.
