

Owner Operator Maintenance Aircraft Course Sheel Metal Repairs 2

This course provides pilots and maintenance personnel with a practical overview of aircraft sheet metal repairs. This is the second class in this series on sheet metal repairs. Participants will gain an understanding of the layout of sheet metal patches, edge distance for patches and rivets and determining number of rivets for a repair.

The course also addresses safety considerations, environmental compliance, and regulatory requirements associated with aircraft sheet metal repairs. Emphasis is placed on industry best practices to ensure quality workmanship, durability, and continued airworthiness.

This is a closed seminar and is limited to Ron Ciura's Tuesday night class only. For additional information contact Ron Ciuria at: magman366@gmail.com
