

Tailwheel Safety Seminar

A dynamic safety seminar exploring the unique characteristics of tailwheel aircraft, brought to life through real-world accident case studies. While especially valuable for tailwheel pilots, this session is open to anyone eager to deepen their understanding and join an engaging, high-energy discussion on the art and discipline of taildragger operations.

Fly in and park on the main ramp, or drive in and park in the FBO Centric Aviation lot. Hangar 4 is the navy and white hangar next to the open grass lot. Follow signs from FBO to hangar.

A message from the National FAASTeam Manager
