

The FAA Safety Team presents:

Airspace For Instructors

More often than not, students learn airspace at the rote and understanding level. We will explore ways to enhance airspace knowledge up to the application, and more importantly, correlation levels through an analysis of how and why airspace is constructed. The airspace interface between VFR and IFR flight rules will be illustrated and airspace violation mitigation strategies will be presented. Please click on the link below for more details and to register on-line for this informative event!

Directions: Please see map link for directions, seminar will be held in the Managers Conference Room.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
