

The FAA Safety Team presents:

Traffic Situation Awareness with Alerts Course at HELI-EXPO 2014

This session will explore the development of NextGen traffic situational awareness and alerting (TSAA) systems for helicopters, as one of the applications of automatic dependent surveillance-broadcast (ADS-B) technology. Upon completion of the session, attendees will be familiar with the capabilities and limitations of NextGen flight-deck technology for TSAA in rotorcraft. Reduction of runway incursions has been a top strategic objective for the Federal Aviation Administration (FAA) over the last decade and repeatedly listed on the National Transportation Safety Board (NTSB) Most Wanted List of Transportation Safety Improvements.. This course is offered at the HAI Rotor Safety Challenge at HELI-EXPO 2014. Safety Challenge courses are FREE to all HELI-EXPO 2014 registered attendees.

Attend at least six Rotor Safety Challenge sessions at HELI-EXPO 2014 and receive a certificate of recognition for completing the 2014 HAI Rotor Safety Challenge.

Take the Safety Challenge in three simple steps:

- Select safety sessions to attend from the HAI Rotor Safety Challenge Schedule. To see the full
