

The FAA Safety Team presents:

**Awake at the Stick: Managing Operational Fatigue Course at  
HELI-EXPO 2014**

Fatigue in transportation operations is recognized as a significant safety issue by organizations such as the FAA, National Transportation Safety Board, and International Civil Aviation Organization. Fatigue risk management systems are the newest addition to the fatigue management toolkit and provide a framework for processes that can be applied in operations large and small. Drawing on years of experience in research and operational settings, this session will present effective and practical strategies and tools for managing operational fatigue risks.

Attendees will learn to: Improve knowledge and awareness of fatigue-related risks in operations. Better recognize signs and symptoms of fatigue in themselves and others. Gain understanding of the Fatigue Risk Management System approach. Enhance understanding of practical tools and processes to monitor and manage fatigue risks in an operation.

**Directions:** Classroom 304B.

**A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
