

HUMS 201: Taking Your CBM Program to the Next Level at HELI-EXPO 2014

This session will cover helicopter vibration systems, vibration analysis, and the concept of condition-based maintenance (CBM), as well as the history of its use from an actual maintainer's perspective. More importantly, the presenter will reveal why CBM should be an essential part of every maintenance program, how to properly manage the program, and how it can positively impact the safety culture of an organization.

Attendees will leave with: A basic understanding of the principles of CBM and the benefits of an effective CBM program. The interrelationship of CBM and a proactive safety management system program Ideas and resources for implementation.

Directions: Classroom 304D.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.
