

N/A presents:

CRM for Helicopter Operations Course at HELI-EXPO 2014

This course will strip away the theory, behavior analysis, and “kinder, gentler” sides of many common crew resource management (CRM) courses and will instead focus on simple, sensible, easily recalled procedures for maximizing crew coordination during high-threat, task-saturated operations involving rotorcraft. This course is tailored toward helicopter air ambulance, search and rescue, law enforcement, utility operations, and other operators with a flight crew of two or more individuals.

Attendees will, by the end of the class, be able to — Conduct a personal readiness inventory of their operations Identify common communication barriers, the elements of situational awareness, and hazardous attitudes Implement attributes of active listening.

Directions: Classroom 208A, Level 2.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
