

The FAA Safety Team presents:

HFDM 101: Helicopter Flight-Data Monitoring 'unplugged' at HAI HELI-EXPO 2016

Flight data monitoring (FDM) is the systematic, proactive use of digital flight data from routine operations to improve safety within an intrinsically nonpunitive and just safety culture. Industry HFDM experts from the U.S. Helicopter Safety Team (USHST) and the Global HFDM Steering Group describe FDM systems, explain how FDM is employed in a safety management system, examine how to plan for and introduce FDM programs within an organization, and discuss the many benefits of employing FDM programs. This course is offered at the HAI Rotor Safety Challenge at HELI-EXPO 2016. These sessions are FREE to all HELI-EXPO 2016 registered attendees and exhibitors. Attend at least six Rotor Safety Challenge sessions at HELI-EXPO 2016 and receive a certificate of recognition for completing the 2016 HAI Rotor Safety Challenge.

Take the Safety Challenge in three simple steps:

Select safety sessions to attend from the HAI Rotor Safety Challenge Schedule. To see the full Safety Challenge schedule, visit <http://www.rotor.com/takethechallenge>.

At the conclusion of each session, receive an
