

Bust the Rust - Not Your Engine

Thanks to AeroSafety for the use of their classroom. This is a last minute change of speaker and presentation. Our "Bust the Rust" seminars continue with a discussion of how an aircraft piston engine works, what the various components are, what your POH says about proper engine operation and what it means, leaning techniques, and engine instrumentation and Join us, learn, share, and grow as a pilot.

Make August the month you re-immersed yourself in aviation. Hang out with other pilots, make new friends, share your experiences, and go fly!

Directions: Aero Safety Training is located on the corner of Beaverbrook Road and Jacksonville Road. Parking is available in the adjacent lot.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
