

FAASTeam presents:

Performance (Part 2/3) -Keeping Weight and Balance in check- an online webinar

Do you perform a weight-and-balance calculation before every flight?

Our "Bust the Rust" series of webinars continues with a review of weight-and-balance terminology followed by a derivation of the formulas, practical use examples, and simple ways to integrate weight and balance calculations into preflight planning. We'll connect a few dots between weight-and-balance and aerodynamics, aircraft stability and control, airworthiness, and maintenance. A special emphasis will be placed on operational differences between rental aircraft and owned aircraft.

Directions: Register by clicking on the GoToWebinar link below. (DO NOT REGISTER ON FAASAFETY.GOV USE THE BLUE LINK IN THIS SECTION).

Wings Credit will be assigned the next day to those attending the full presentation.

Please register for Rusty on Weight and Balance? on Aug 13, 2020 7:00 PM EDT at:

<https://attendee.gotowebinar.com/register/7261074043016055051>

After registering, you will receive a confirmation email containing information about joining the webinar.
