

FAASTeam presents:

## **CFI Professional Development - Instrument Departures**

## CFI/DPE ForumInstrument Departures

Instrument departures procedures do not typically enjoy the same attention to instructional detail as their instrument approach counterparts. Yet, the risks inherent when departing in IMC conditions are arguably greater than when flying an instrument approach.

Beginning with a review of the different types of departure procedures, basic TERPS design criteria, regulations, and pre-flight planning strategies, we will highlight techniques you can use to enhance your student's ADM by considering risk assessment, aircraft performance requirements, navigation methods, and pre-departure briefing.

Then, we'll correlate each of the ACS Know-Consider-Do skill elements with the PTS CFI Instrument Instructor tasks and explore deeper connections that can enhance our ability to transfer knowledge.

This will be a fast-paced, interactive webinar presented by EA25 FAASTeam Lead Representative Don Argintar with support from Designed Pilot Examiner / Lead Representative Ryan Ferguson and Lead Representative Bob Miranda.

## Event Details

**Thu, Feb 23, 2023 - 19:00 EST**
