Sat, May 10, 2025 at 10:00 EST

Costanzo Air Flight School

165 Passaic Ave

Suite 103

Fairfield, NJ

- Proper flight planning based on hot weather performance and fuel/passenger considerations.
- Recognizing and mitigating risks associated with high density altitude.
- Practical techniques for runway and climb performance optimization in hot conditions.
- Effective methods for avoiding and managing summer weather hazards like thunderstorms.
- Refreshing your knowledge of key flight instruments and their role in changing weather scenarios.

Led by our instructors, this catered seminar offers practical insights, real-world examples, and actionable strategies to ensure your summer flying season is safe, efficient, and enjoyable.

Our building is located across from the control tower and our first floor windows are covered in colorful signage you cannot miss. There is plenty of parking for those driving in. We are also accessible through local NJ buses.

To receive WINGS credit, please fill out the attendance sheet available at by the entrance.
