

Pre-flight and Airworthiness

This seminar is a closed event open only to members of New Jersey Ninety-Nines. For further information, please contact Don Argintar at 201-897-2344.

This is a special event where we will present to you a Cessna 172 rigged with airworthiness issues. We will review what airworthiness is, how it works, and what your responsibilities are. Then, each pilot will conduct their own walk-around and have an opportunity to find these issues. This is a terrific opportunity to hone your detective skills and learn a little more about aircraft systems. After everyone has had a chance to complete their own pre-flight, we will reveal all of the "defects".

This event will be held at Caldwell Airport in Air Fleet's maintenance hangar located at the south end of the field. Parking is available in the adjacent Air Bound parking lot, as well as the parking lot just north of the gate. [Click](#) to display the location in Google maps.
