

How to Land in a Tree - Bridging the Gap Between Emergency Training and Real Life

Event Details

Pilots train for in-flight emergencies, but when it actually happens, many are surprised at how quickly things unravel. Hear real stories and lessons learned from an off-field landing after a catastrophic engine failure, an engine overheat at night, aircraft icing, and more.

With those experiences as a foundation, we'll examine a wide variety of in-flight emergencies and discuss how to better prepare for the unexpected — bridging the gap between training and real life to improve your odds of a successful outcome.

Guest speaker Jason Archer - Master Instructor, CFI, CFII, MEI, SES, G, AGI, IGI, Lead FAASTeam Rep, Gold Seal Instructor.

Our building is located across from the control tower and our first floor windows are covered in colorful signage you cannot miss. There is plenty of parking for those driving in. We are also accessible through local NJ buses.
