

Approach and Landing

Spring weather usually affords more opportunities to fly, coming after a period of relative inactivity. Are you ready for crosswinds? Have you calculated your takeoff and landing data? Good approaches usually lead to good landings. This briefing reviews safe approach and landing basics to get aircrews prepared for increased flying opportunities in various conditions.

Directions: Approach and Landing briefing will be conducted in the main auditorium during Civil Air Patrol National Capital Wing's Annual Conference.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
