

FAASTeam presents:

## **Causal Factor Analysis More Useful than RCA?**

When organizations conduct safety investigations, their purpose should be to prevent the hazard or incident from happening again. Often, root cause analysis (RCA) falls short of this goal because it may ignore more actionable causal factors. Join us to learn the causal factor analysis technique, including how easy it is for people to read and understand a report that uses this format.

This course is offered at the HAI Rotor Safety Challenge at HELI-EXPO 2019. These sessions are FREE to all HELI-EXPO 2019 registered attendees and exhibitors.

Attend at least six Rotor Safety Challenge sessions at HELI-EXPO 2019 and receive a certificate of recognition for completing the 2019 HAI Rotor Safety Challenge.

Take the Safety Challenge in three simple steps:

1. Select safety sessions to attend from the HAI Rotor Safety Challenge Schedule. To see the full Safety Challenge schedule, visit <http://www.rotor.com/takethechallenge>.
2. At the conclusion of each session, receive an official token from the room monitor or presenter.
3. Once you have earned at least six tokens, drop by the HAI Safety Committee Booth on the show floor, turn in your chips to a committee member,
