

FAASTeam presents:

BowTie Methodology for Safety Management - Part 1 - Safety Risk Management

This session introduces the BowTie Methodology and its use in analyzing and controlling operational hazards through use of a highly visual method. Hazards are decomposed into their various elements, identifying threats, consequences, and the appropriate controls necessary to mitigate to an acceptable level the risks to the organization, its people, and assets. Attendees will develop skills in identifying and analyzing operational hazards in rotorcraft operations using visual BowTie techniques. Consider also attending Part 2: Safety Assurance (see the Wednesday, 1/29, 1:30 pm – 2:30 pm session description).

Directions: Room 207AB
