

Offshore Evacuations with Floats with Integrated Life Rafts

In our experience of providing float systems over the past 20 years, we regularly get requests from operators asking how to use the floats, how to enter a life raft, and what to look for in an emergency. This knowledge can mean the difference between life and death. Attendees will learn what to look for when operating the floats during an emergency, what to expect after water contact, and how to operate the Liferaft system.

Directions: Room 207AB
