

What the FRAT?

Why do I need to use a flight risk assessment tool (FRAT)? Do I have to do it? When? Who? The power of a FRAT cannot be realized without understanding the answers to these questions. This session will help operators and aircrew make flight risk assessments a welcome benefit to their operation instead of another piece of dreaded red tape. Attendees will learn about the human factors that drive the need for FRATS, how to create and use one during daily operations, and how to use the data they generate to improve safety and operational efficiency.

Directions: Room 207C
