

Difficult Decisions - Choices and Consequences

The seminar is geared to explore our decision making process that we face on each flight. Some decisions are easy (what altitude should I pick?) while some have much greater consequences and should be taken very seriously.

This event will be interactive for the participants as scenarios will be presented and given to the group for analysis. The goal is to help pilots learn to think through each decision, weighing the consequences along the way to arrive at the safest outcome of the flight. All pilots are welcome from student to ATP and are encouraged to participate in each of the scenarios.
