

Flying Blind

You may have 20/20 vision, but what do you really see? In this session, we'll examine the human brain (hardware) and human mind (software) as they relate to our visual system. Too often, we "look" but do not "see." This can be a function of our "software" and/or "hardware." In all cases, this blindness must be understood so that we may incorporate techniques to improve our visual performance.

Room B41 of the Georgia World Congress Center in Atlanta, GA

VERTICON 2026 Foundation Industry Presentations

There is a cost for this event. Attendees must register and pay for VERTICON attendance by visiting the VAI link below:
