

SMS for Small Fleet or Private Operators

The possibility of poor safety performance can be the same no matter the size or scope of your operational configuration. To create positive outcomes that are consistent, aircraft operators are compelled to have effective risk management processes. A safety management system (SMS) is a structured approach for proactively identifying and controlling the hazards to which you may be exposed. In this session, participants will better understand the SMS requirements and how to align this framework with their small-fleet or private operation.

Room B409 of the Georgia World Congress Center in Atlanta, GA

VERTICON 2026 Foundation Industry Presentations

There is a cost for this event. Attendees must register and pay for VERTICON attendance by visiting the VAI link below:
