

Implementing Health and Usage Monitoring System (HUMS) New Operators Panel Perspectives

Event Details

Listen to and ask questions of a panel of experienced rotorcraft operators as they discuss what they've learned during their first year implementing a health usage monitoring system (HUMS) in their maintenance and flight operations. Discussions will cover how the panelists chose their preferred system, where they decided to do the installation, what "the first day" means, what happens when they get alerts, how they leverage HUMS for their safety management system program, and more. The target audience is primarily maintenance, operations, and safety leaders.
