

## Understanding the Limitations of Flight Training

This session dives into the limitations of flight training, the pitfalls of training scars, how some training may lead to poor habits and misunderstandings regarding aircraft, and in-flight emergencies. At the completion of the session, attendees will be able to determine methods for reducing training scars, explain the differences between a simulated aircraft emergency and a real aircraft emergency, and consider techniques to prepare pilots for in-flight failures that are difficult to practice in a training environment.

Room B402 of the Georgia World Congress Center in Atlanta, GA
