

Aero Elite Flight School July Safety Meeting-When All Goes Quiet Forced-Landing Decision Making

Event Details

Kevin Lang, CFI, CFII, and MEI will deliver a presentation that explores forced-landing decision making focused on survivability rather than 'perfect' outcomes. Drawing from extensive scenario practice and instructional experience, the session examines how pilots can transition from searching for perfect landing sites to identifying better options; options that increase survivability even when conventional options are limited.

Topics include:

How environmental conditions change forced-landing priorities at night and in IMC

When water, roads, or nontraditional landing areas may represent safer choices

Avoiding fixation on unreachable airports or the 'perfect' field
