

The FAA Safety Team presents:

## 'Tis The Season!

Cold Air Damming (CAD) events in the Mid-Atlantic and Southeastern United States are not uncommon weather phenomenon. They can produce aviation weather hazards capable of ruining an otherwise wonderful flying experience for a pilot and his / her passengers. Cold air damming is defined as "the piling up, or complete blocking, of cold air approaching the slopes of a mountain barrier". Attend this exclusive briefing and learn how to avoid these in-flight predicaments. Seating is limited. Register NOW by clicking on the link below!

**Directions:** Guilford Tech T.H. Davis Aeronautical Center at the Piedmont Triad International Airport. Room 151.

### **A message from the National FAASafety Team Manager**

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.

### Event Details

**Wed, Nov 20, 2013 - 6:30 pm**

**T.H. Davis Aviation Center**

250 Regional Road

Greensboro, NC 27409
