

'Weather Or Not': Update Your IFR Knowledge

Instrument flying requires precision, attention to detail, and sound decision making skills. The ability to operate in marginal VFR and IFR conditions allows more mission capability of GA aircraft but at the same time introduces new elements of risk. Join us as each week we discuss key topics for marginal weather and IFR operations, examining them from a risk management perspective.

The IFR Operations Review will run 4 weeks, meeting every Thursday evening from 6:30-8:00 at FlightGest. Look for other announcements to follow.

Directions: General Aviation Terminal is located between Landmark Aviation and Tac-Air. 4 Hour free parking in GA Parking area. Keep your parking ticket.

A message from the National FAASafetyTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
