

CFI Forum: Conducting an IPC

Loss of Control in IMC is a leading cause of accidents and too often it is an instrument pilot that falls victim to this conundrum. Proper proficiency training and checking from a knowledgeable CFI is one way to mitigate this causal factor. Learn how best to prepare and conduct this very important and often neglected flight training event. This seminar is so important that it is open to all airmen and is not limited to Certified Flight Instructors. Seating is limited. Click on the link below and Register Today.

Directions: From Hwy 52 North, take the Liberty Street Exit 111A. Follow the signs for the Smith Reynolds Airport. From Hwy 52 South, take the Akron Drive exit. Turn left on Akron Drive, then right on North Liberty Street. The old airport terminal is on the east side of Liberty Street. Seminar held in the Old Smith Reynolds Terminal Building. Look for seminar signs on North Liberty Street airport entrance.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
