

Flight In the Danger Zone - Non Towered Airport Operations

Operations at non-towered airports can be a high-risk mixing bowl of jets, turbo-props, single engine trainers, and light sport aircraft. Communications are optional. Learn what you can do to improve your safety and the safety of others in the pattern with you. Volunteer to participate in a traffic pattern scenario skit that gets everyone in the room involved.

You may very well see yourself in many of the traffic conflicts that occur in the skit. This presentation has been performed in numerous locations with much success. In addition we will honor two distinguished airmen with the Wright Brothers Master Pilot Award. Click the link below and Register Today; Seating is limited!

Directions: Please see map link. Seminar to be conducted in the old FSS next to Tradewinds Aviation facility. Look for FAA Seminar signs to building.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
