

Mayday Mayday - ATC and You

During an in-flight emergency, ATC will always give you priority over other aircraft. This is the one time you can legally make that 747 go around so you can land first. But sometimes ATC's well intended instructions may result in unintended life-threatening consequences. Attend this seminar to learn when it may be best to say "NO" to ATC instructions during an emergency.

Directions: The Aviation Technology building is first building on right at the end of Aviation Drive. The break room is the first room on left after entering the front door.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
