

FAA Safety Team and the Greensboro FSDO presents:

Monthly IMC Club Meeting - Glide Ratio

You are flying through the clouds, ATC changes your clearance to a new, higher altitude. Push in the throttle, the engine does not cooperate. What should you do? What do you need to consider? IMC Club, through its nationwide chapters, provides organized “hangar flying” focused on building proficiency in instrument flying. Believing that safety and proficiency are developed through education and experience, monthly meetings use real world scenarios to engage our members, and allow them to share and build their experience. This seminar is for IFR pilots, IFR students and anyone thinking about flying in the clouds. Bring your iPad or other device to view instrument procedures. Click on the link below and register TODAY!

Directions: Seminar will be held in the Wings of Carolina hangar facility.

As you enter the airport, turn right on Ammons Farm Road.

With the fence on the left, look for the Wings of Carolina banner on left, turn into gate, the Wings of Carolina building is on your left just before you enter the South airplane ramp. When flying in, park in any of the spots with tiedown ROPES.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
