

Runway Incursion Avoidance

An area of special emphasis on FAA Practical Tests, Runway Incursions are a very important topic. We will explore a variety of strategies recommended by the FAA (AC 91-73B) to avoid being involved in a runway incursion. We will also discuss LAHSOs and communications procedures.

Directions: From Aviation Parkway, enter at the stoplight, continue about 1/4 mile, and enter the parking lot on the right. At the entrance to the complex, the suite is numbered 208 and is ahead and to the right of the entrance. Parking is available in front of the facility. Once inside, the class will be held in the large classroom in the back of the facility. You may also fly in to RDU for this event. A shuttle is available from the FBO to the training center and landing fees have been waived for attendees who park at Signature Flight Support.

A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
