

## Crash Course in Human Factors

This presentation is not to point blame at anyone. The object of this presentation is to point out the stark reality of how easily a pilot can let their guard down and become a statistic of Human Error.

To promote a positive safety culture we need to mentor each other. The accident rate is so low in this country that to get to the next level, attitudes need to change concerning the guy that “everyone knew” would be the next casualty. That person needs to have a helping hand and open mind offered in the name of safety.

**Directions:** The college is the first building on the right as you come down Aviation Drive

### A message from the National FAASTeam Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASTeam) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the “Contact Information” area of the meeting/event notice. Note that two weeks is usually required to arrange services.
