

## Pilot/Controller Forum

At this event, we'll be discussing why pilot deviations are such a big deal. We'll discriminate between ground and air deviations and offer tips for success in PD Avoidance. We'll be joined by representatives from KILM air traffic control and we'll discuss local problems and challenges with respect to ATC tower, approach/departure, and en route operations.

Finally you'll have an opportunity to ask our friends in ATC any questions you may have. And, because it is a forum, they'll also get to ask questions of you. To attend, click the link below and register TODAY.

**Directions:** Come into Air Wilmington, enter Harrier Room, first left down the hallway.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
