

FSDO presents:

# Pizza Night - Evaluating Risk

We've developed a lot of acronyms over the years such as ADM, TEM, SMS, CRM, and SRM that describe the process of detecting hazards, assessing risk and eliminating or mitigating those risks to acceptable levels. Whatever you choose to call it; a systematic process for defining what you're getting into and deciding how to deal with it is essential to safe flight operations. At this informative meeting, we're going to talk about how and when we evaluate Safety Risk Management for our flights and we'll share some SRM education best practices along the way.

Definitions for Acronyms used in the Brief Description above.

ADM - Aeronautical Decision Making,  
TEM - Threat and Error Management,  
SMS - Safety Management System,  
CRM - Cockpit and Crew Resource Management,  
SRM - Safety Risk Management
