

FAASTeam presents:

Monthly IMC Club Meeting - Going Up or Down

You are flying from Chicago to Richmond to watch a friend's son play baseball. It's important to get there for the game and to get home on time for work commitments.

The chosen altitude is 11,000 feet, an easy trip for your SR22 and takes advantage of winds aloft. Weather forecast looks good.

A short while into the trip, you start picking up ice over northern Indiana. What should you do? Let's discuss options and concerns.

IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building proficiency in instrument flying. Believing that safety and proficiency are developed through education and experience. Monthly meetings use real world scenarios to engage our members and allow them to share and build their experience. For IFR pilots, IFR students and anyone thinking about flying in the clouds. Bring iPad or other device to view instrument procedures. Click on the link below and register TODAY.

Directions: Seminar will be held in the WINGS of Carolina hangar facility.

As you enter the airport, turn right on Ammons Farm Road.

With the fence on the left, look for Wings of Carolina banner on left, turn into gate, Wings of Carolina building is on your left just before you enter the South airplane ramp.

When flying in, park in any of the spots with tiedown ROPES
