

FAASTeam presents:

Monthly IMC Club Meeting -Takeoff Dilemma

You have just taken off in IFR conditions, the passenger door isn't latched properly. What's the best course of action? Try to close the door? Ask for vectors for an instrument approach? Divert somewhere else?

And your family is not happy with the door open. There's a drip on the passenger from the fog and light rain. Your wife in the back seat is frightened.

Let's discuss alternatives and options IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building proficiency in instrument flying. Believing that safety and proficiency are developed through education and experience. Monthly meetings use real world scenarios to engage our members and allow them to share and build their experience. For IFR pilots, IFR students and anyone thinking about flying in the clouds. Bring iPad or other device to view instrument procedures. Click on the link below and register TODAY.
