

In-flight Weather Options without HIWAS

There have been many changes in weather information available to pilots recently and more changes to come. ADS-B, TIS, Foreflight, 1800wxbrief.com, AWOS are all in current use. The familiar HIWAS from notated VORs ended on 08JAN2020. What options do pilots have to obtain current weather enroute?

Directions: From Aviation Parkway, enter Gateway Centre at the traffic light and take the third driveway on the right. Blue Line is at the top of the hill at that entrance. Parking is available on either side of the entrance. Uber is available To/From the training center if flying into RDU. Allow extra time during rush hour.
Ask for Blue Line large conference/training room
