

FAASTeam presents:

Monthly IMC Club Meeting

It's a gentle IMC day, low clouds but well above minimums. You plan a circuit of a few airports, planning to do one approach at each of them. ATC may not be too busy as VFR pilots will certainly be on the ground today.

You do the approach at the first airport. As you execute the missed approach, something is wrong with the engine.

What now?

Let's discuss alternatives and options IMC Club, through its nationwide chapters, provides organized "hangar flying" focused on building proficiency in instrument flying. Believing that safety and proficiency are developed through education and experience. Monthly meetings use real world scenarios to engage our members and allow them to share and build their experience. For IFR pilots, IFR students and anyone thinking about flying in the clouds. Bring iPad or other device to view instrument procedures. Click on the link below and register TODAY.
