

## Navigating Busy Airspace

Navigating busy airspace takes more than just sharp flying. It requires clear communication, strict compliance, and confident command of your aircraft. During this month's Safety Seminar, we'll dive into the challenges and best practices of operating in congested and controlled airspace, particularly in areas like the Raleigh-Durham Class C environment. Whether you're a student building time or a seasoned pilot staying current, this seminar will cover actionable strategies, helping you improve situational awareness, enhance ATC communication techniques, maintain compliance under pressure, and avoid common errors that lead to pilot deviations. This is a great opportunity to expand your knowledge, ask questions, and connect with fellow pilots in the community.

Upon entering Atlantic Aviation's main general aviation terminal, take a right. The Atlantic Aviation conference room is located immediately to your right on the lower level.
