

Hot - High and Hazardous - Summer Storms and Safety of Flight

When the weather heats up, so do the risks. In this month's Safety Seminar, we'll take a closer look at the unique challenges of summer flying — from high-density altitude to rapidly building thunderstorms. We'll discuss how to recognize hazards early, make sound decisions under changing conditions, and keep safety at the center of every flight. Join us for a valuable opportunity to sharpen your skills, ask questions, and connect with fellow pilots in the community.

Upon entering Atlantic Aviation's main general aviation terminal, take a right. The Atlantic Aviation conference room is located immediately to your right on the lower level.

A message from the National FAASTeam Manager

Earn your WINGS to get a chance to win a prize. Go to <https://www.wingsindustry.com/WINGS-Sweepstakes> for more info. Join us on Facebook: <https://www.facebook.com/groups/GASafety/>
