

WX Resources - Look What is Available!

The 21st Century has brought an unprecedented wealth of information to general aviation cockpits. Near real time graphical and textual weather products contribute greatly to pilot situational awareness and decision making. But pilots must understand the capabilities and limitations of the equipment and the information it provides.

- More pre and in-flight weather information is available than ever before but with that wealth of information comes complexity. Pilots must be comfortable with their choice of weather information services and they must be competent in making critical flight decisions based on assessments of the information provided.

From Highway 58; turn onto Spencer-Preston Rd; In one half mile - Turn left onto Airport Rd - in one half mile, FBO will be on the left.

A message from the National FAASTeam Manager
