

Avionics Aircraft Types and Safe Transitions

This seminar will help pilots at any stage understand their aircraft options and transition between them safely. We'll compare glass cockpit systems (G1000 NXi, G1000, G3X-Touch) with traditional instruments, explain what Technically Advanced Aircraft (TAA) means and why it matters for training and safety. You'll learn how to choose the right aircraft for your current goals, why diversifying your experience across multiple types strengthens your skills, and get actionable tips for transitioning safely, including common mistakes to avoid.

Upon entering Atlantic Aviation's main general aviation terminal, take a right. The Atlantic Aviation conference room is located immediately to your right on the lower level.
