

The FAA Safety Team presents:

Can an iPad Really Save Your Life?

Attend this exciting event featuring two briefings! At the first we will discuss general aviation runway accident prevention including towered and non-towered operations. What's the real meaning behind "Line Up and Wait"? What's the proper sequence when airports have no taxiways? Learn risk management strategies to prevent runway accidents! The second half of the program will examine the way technology is changing the way we fly. Many pilots are flying with an iPad in the cockpit but still purchase and carry paper charts. Are you safe if you fly with just an iPad? Come join an interactive discussion and live presentation about the good and the bad of flying with an iPad alone. Learn from experienced pilots that use the iPad for their sole source of information. Is it legal? What is your backup system?

Directions: Left on Albion road to the large Avports Hangar.

A message from the National FAASafety Team Manager

Over 10,150 AMTs earned an AMT Award last year. Will you, this year?

Sign up for the FAA's safety services at www.FAASafety.gov!

The FAA Safety Team (FAASafety Team) is committed to providing equal access to this meeting/event for all participants. If you need alternative formats or services because of a disability, please communicate your request as soon as possible with the person in the "Contact Information" area of the meeting/event notice. Note that two weeks is usually required to arrange services.
