

## Flight Operations In The Danger Zone

CANCELED Due to the impending winter storm, this event has been canceled! Effective communication is a necessary part of the two-way radio environment. Although not required at non-towered airports, all pilots are encouraged to use radio communications while operating at non-towered airports. But, what you say is just as important as saying it! Factors including wording, inflection and timing can cause different meanings. This exclusive briefing will be interactive and encourage audience participation. Do you use only standard phraseology when communicating over the airwaves? How proficient are you? Attend this informative briefing and find out! Click on the link below to register and get all of the details.

**Directions:** See Map Link to Tom Harvey Road and continue to Dooney Aviation on Road B.

### A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area  
Sign up for the FAA's safety services at [www.FAASafety.gov](http://www.FAASafety.gov)!
