

Crunch Time!

More accidents occur in the takeoff and landing phases of flight than any other. It is the close proximity to the ground that leaves less margin for error. Some pilots never really master the basics, then it's only a matter of time before they have a problem. Is the runway long enough? Are there obstructions? What is the density altitude? Is there a cross-wind? How good is your airspeed control? Do you know how to successfully recover from a bounced landing or when to go around? There are many lessons to be learned as pilots continue to experience takeoff and landing accidents nearly everyday! Coffee and donuts will be served. Click on the link below and register TODAY!

Directions: Follow signs to Airport-Route 1 to Merrimac St. Turn East to go to airport which will be on the right.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!

Event Details

Sat, Sep 28, 2013 - 10:00 am

Plum Island Airport

24 Plum Island Turnpike

Hangar

Newbury, MA 01951
