

AVPORTS & RI FAAST Team presents:

Don't Learn By Accident

During this exclusive seminar we will review NTSB Case Studies of three fatal accidents. We will explore the details that led up to each accident, followed by a review of Cockpit Resource Management (CRM) to determine what actions could have been taken by the pilot to escape disaster. Application of CRM skills enables pilots to avoid fatal accidents every day. Attendance at this event will give you the edge you need to stay ahead of the game and arrive at your destination safely every time. Click on the link below and register TODAY!
